Decades of expertise. Zero AI visibility.

What we found when we scanned Hong Kong's mortgage sector for AI visibility.

Swipe →

THE SCAN

We asked AI what mortgage buyers ask.

The same questions, on the same engines, for every brand.

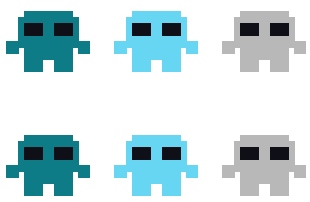

10

Mortgage brands

16

Shared buyer questions

6

AI engines

/100

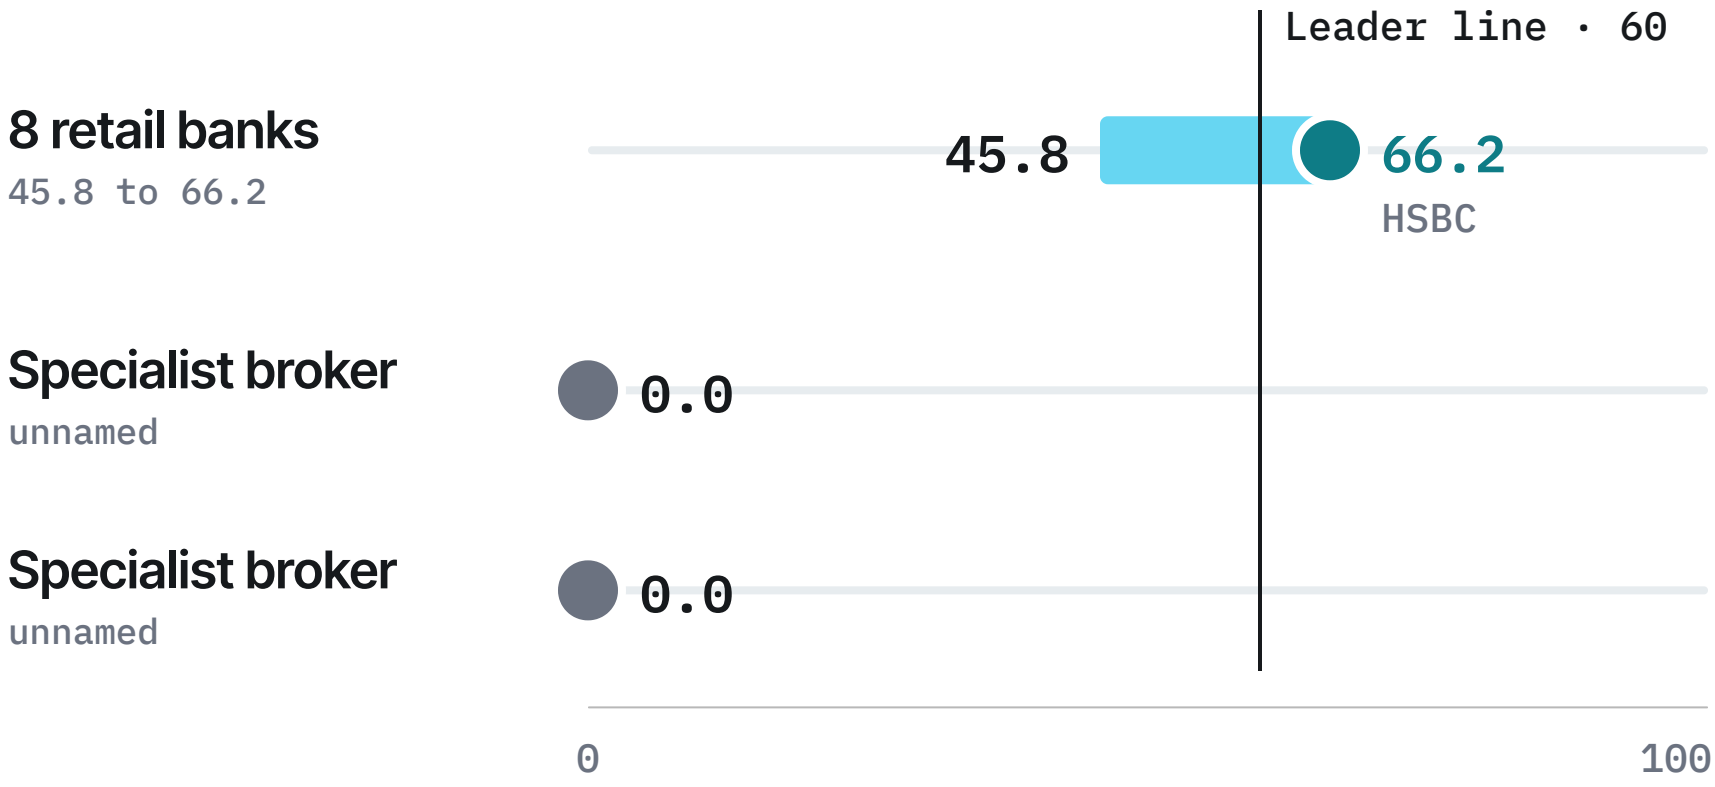

AI visibility score per brand

THE RESULTS

Every bank tested showed up. Neither broker did.

AI VISIBILITY SCORE, OUT OF 100

Scores across 16 shared buyer questions and 6 AI engines.

Source: Geoneo AI visibility scan, Hong Kong mortgage sector.

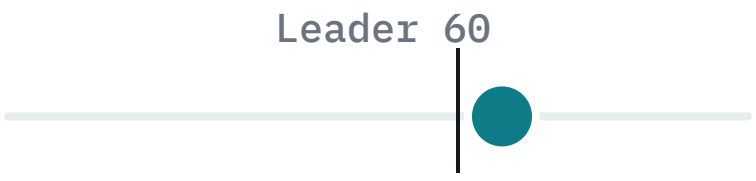

THE CONTRAST

Same questions. Very different answers.

HSBC

66.2

The only brand above the 60-point Leader line.

2 SPECIALIST BROKERS

0.0

Invisible across all 16 buyer questions.

Broker · not named in any answer

THE PARADOX

Decades of expertise, client trust and market share.

Expertise

Client trust

Market share

And AI engines still can’t find you.

WHY

The expertise lives where AI can't look.

WHERE BROKERS' EXPERTISE LIVES

- Advisers
- Rate calculators
- Phone calls

WHAT AI CAN READ

- Clear facts
- Dated facts
- Machine-readable

AI can only cite what it can retrieve and verify.

WHAT A ZERO MEANS

A 0.0 is not a verdict on the business.

0.0 ≠ a lack of authority

0.0 ≠ a lack of quality

0.0 = knowledge not published in a form AI can read

WHAT TO DO

Make what you know readable for AI.

Turn expertise into public facts AI can check

Rates · Fees · Eligibility · Licensing

Keep them dated and consistent

On your own site and across every listing.

Answer the questions buyers actually ask AI

Start from the buyer’s question, not your product page.

OVER TO YOU

Which is harder for your team: creating new content, or making what you already know readable for AI?

OPTION A

Creating new content

OPTION B

Making what we know readable
